Author Index

Adan, I. J. B. F.; see van den Broek, M. S.
Alfieri, Arianna; Groot, Rutger; Kroon, Leo; Schrijver, Alexander. *Efficient Circulation of Railway Rolling Stock*. 378.
Anh, Tuan Le. *Intelligent Control of Vehicle-Based Internal Transport Systems (TSL Dissertation Abstract)*. 253.
Antoniou, Constantinos. *Online Calibration for Dynamic Traffic Assignment (TSL Dissertation Abstract)*. 250.
Archetti, C.; Speranza, M. G.; Hertz, A. *A Tabu Search Algorithm for the Split Delivery Vehicle Routing Problem*. 64.
Archetti, Claudia; Savelsbergh, Martin W. P.; Speranza, M. Grazia. *Worst-Case Analysis for Split Delivery Vehicle Routing Problems*. 226.
Avineri, Erel. *The Effect of Reference Point on Stochastic Network Equilibrium*. 409.
Ball, Michael O.; see Vossen, Thomas W. M.
Bar-Gera, Hillel. *Primal Method for Determining the Most Likely Route Flows in Large Road Networks*. 269.
Barnhart, Cynthia; see Lan, Shan.
Basso, Leonardo J.; Jara-Díaz, Sergio R. *Are Returns to Scale with Variable Network Size Adequate for Transport Industry Structure Analysis?* 259.
Berman, Oded; Wang, Qian. *Inbound Logistic Planning: Minimizing Transportation and Inventory Cost*. 287.
Bierlaire, Michel; Crittin, Frank. *Solving Noisy, Large-Scale Fixed-Point Problems and Systems of Nonlinear Equations*. 44.
Birge, John R.; see Yen, Joyce W.
Boxma, O. J.; see van den Broek, M. S.
Boyce, David; Nagurney, Anna. *In Memoriam: C. Bartlett McGuire (1925–2006) and Christopher B. Winsten (1923–2005)*. 1.
Bukkapatnam, Satish; see Zhao, Jiamin.
Campbell, Ann Melissa; Savelsbergh, Martin. *Incentive Schemes for Attended Home Delivery Services*. 327.
Cantillo, Victor M. *Discrete Choice Models Incorporating Minimum Thresholds of Perception and Valuation of Attributes (TSL Dissertation Abstract)*. 250.
Chen, Zhi-Long; Xu, Hang. *Dynamic Column Generation for Dynamic Vehicle Routing with Time Windows*. 74.
Choo, Sangho. *Aggregate Relationships Between Telecommunications and Travel: Structural Equation Modeling of Time Series Data (TSL Dissertation Abstract)*. 251.
Clarke, John-Paul; see Lan, Shan.
Crittin, Frank; see Bierlaire, Michel.
Daganzo, Carlos F.; see Goodchild, Anne V.
Daganzo, Carlos F.; see Ouyang, Yanfeng.
de Palma, André; Picard, Nathalie. *Equilibria and Information Provision in Risky Networks with Risk-Averse Drivers*. 393.
Dell'Amico, Mauro; Righini, Giovanni; Salani, Matteo. *A Branch-and-Price Approach to the Vehicle Routing Problem with Simultaneous Distribution and Collection*. 235.
Desaulniers, Guy; see Hamdouni, Mohamed.
Dessouky, Maged M.; see Quadrifoglio, Luca.
Dessouky, Maged; see Zhao, Jiamin.
Francis, Peter; Smilowitz, Karen; Tzur, Michal. *The Period Vehicle Routing Problem with Service Choice*. 439.
Günlük, Oktay; Kimbrel, Tracy; Ladanyi, Laszlo; Schieber, Baruch; Sorkin, Gregory B. *Vehicle Routing and Staffing for Sedan Service*. 313.
Gao, Song. *Optimal Adaptive Routing and Traffic Assignment in Stochastic Time-Dependent Networks (TSL Dissertation Abstract)*. 249.
Gendreau, Michel; Iori, Manuel; Laporte, Gilbert; Martello, Silvano. *A Tabu Search Algorithm for a Routing and Container Loading Problem*. 342.
Gendreau, Michel; see Ichoua, Soumia.
Goodchild, Anne V.; Daganzo, Carlos F. *Double-Cycling Strategies for Container Ships and Their Effect on Ship Loading and Unloading Operations*. 473.
Groot, Rutger; see Alfieri, Arianna.
Hall, Randolph. *TSL Dissertation Abstracts: 2005 Transportation Science and Logistics Section Dissertation Prize Competition*. 248.
Hall, Randolph W.; see Quadrifoglio, Luca.
Hamdouni, Mohamed; Desaulniers, Guy; Marcotte, Odile; Soumis, François; van Putten, Marianne. *Dispatching Buses in a Depot Using Block Patterns*. 364.
Hernández-Pérez, H. *Traveling Salesman Problems with Pickups and Deliveries (TSL Dissertation Abstract)*. 252.
Hertz, A.; see Archetti, C.
Huang, Simin. *The Connection Location and Sizing Problem: Models, Methods, and Applications to Supply Chain Design (TSL Dissertation Abstract)*. 252.
Hvattum, Lars M.; Løkketangen, Arne; Laporte, Gilbert. *Solving a Dynamic and Stochastic Vehicle Routing Problem with a Sample Scenario Hedging Heuristic*. 421.
Ichoua, Soumia; Gendreau, Michel; Potvin, Jean-Yves. *Exploiting Knowledge About Future Demands for Real-Time Vehicle Dispatching*. 211.
Iori, Manuel; see Gendreau, Michel.
Ip, Andrew W. H.; see Yung, Kai-Leung.
Jaillet, Patrick; Wagner, Michael R. *Online Routing Problems: Value of Advanced Information as Improved Competitive Ratios*. 200.
Jara-Díaz, Sergio R.; see Basso, Leonardo J.
Kimbrel, Tracy; see Günlük, Oktay.
Klabjan, Diego; see Sandhu, Rivi.
Klabjan, Diego; see Shebalov, Sergey.
Kotnyek, Balázs; Richetta, Octavio. *Equitable Models for the Stochastic Ground-Holding Problem Under Collaborative Decision Making*. 133.
Kroon, Leo; see Alfieri, Arianna.
Ladanyi, Laszlo; see Günlük, Oktay.
Lan, Shan; Clarke, John-Paul; Barnhart, Cynthia. *Planning for Robust Airline Operations: Optimizing Aircraft Routings and Flight Departure Times to Minimize Passenger Disruptions*. 15.
Laporte, Gilbert; see Gendreau, Michel.
Laporte, Gilbert; see Hvattum, Lars M.
Laval, Jorge. *Hybrid Traffic Flow Models: Impacts of Lane-Changing Maneuvers (TSL Dissertation Abstract)*. 253.
Lejeune, Miguel A. *A Methodology for Probabilistic Inventory-Production-Distribution Problems (TSL Dissertation Abstract)*. 254.
Levinson, David; Yerra, Bhanu. *Self-Organization of Surface Transportation Networks*. 179.
Lim, Andrew; Wang, Fan; Xu, Zhou. *A Transportation Problem with Minimum Quantity Commitment*. 117.
Liu, Qi. *A Sequence-Pair and Mixed Integer Programming-Based Methodology for the Facility Layout Problem (TSL Dissertation Abstract)*. 255.

Løkketangen, Arne; see Hvattum, Lars M.
Marcotte, Odile; see Hamdouni, Mohamed.
Martello, Silvano; see Gendreau, Michel.
Moccia, Luigi. *New Optimization Models and Algorithms for the Management of Maritime Container Terminals (TSL Dissertation Abstract).* 249.
Nagurney, Anna; see Boyce, David.
Nelson, Paul. *On Driver Anticipation, Two-Regime Flow, Fundamental Diagrams, and Kinematic-Wave Theory.* 165.
Ouyang, Yanfeng; Daganzo, Carlos F. *Discretization and Validation of the Continuum Approximation Scheme for Terminal System Design.* 89.
Picard, Nathalie; see de Palma, André.
Pisinger, David; see Ropke, Stefan.
Potvin, Jean-Yves; see Ichoua, Soumia.
Quadrifoglio, Luca; Hall, Randolph W.; Dessouky, Maged M. *Performance and Design of Mobility Allowance Shuttle Transit Services: Bounds on the Maximum Longitudinal Velocity.* 351.
Richetta, Octavio; see Kotnyek, Balázs.
Righini, Giovanni; see Dell'Amico, Mauro.
Robinson, Stephen M. *Strong Regularity and the Sensitivity Analysis of Traffic Equilibria: A Comment.* 540.
Ropke, Stefan; Pisinger, David. *An Adaptive Large Neighborhood Search Heuristic for the Pickup and Delivery Problem with Time Windows.* 455.
Salani, Matteo; see Dell'Amico, Mauro.
Sandhu, Rivi; Klabjan, Diego. *Fleeting with Passenger and Cargo Origin-Destination Booking Control.* 517.
Savelsbergh, Martin W. P.; see Archetti, Claudia.
Savelsbergh, Martin; see Campbell, Ann Melissa.
Schieber, Baruch; see Günlük, Oktay.
Schinas, Orestis. *Application of Multicriteria Decision-Making Techniques in Finance: The Case of the Greek Coastal Shipping Companies (TSL Dissertation Abstract).* 255.
Schrijver, Alexander; see Alfieri, Arianna.
Shebalov, Sergey; Klabjan, Diego. *Robust Airline Crew Pairing: Move-up Crews.* 300.
Sherali, Hanif D.; Staats, Raymond W.; Trani, Antonio A. *An Airspace-Planning and Collaborative Decision-Making Model: Part II—Cost Model, Data Considerations, and Computations.* 147.
Smilowitz, Karen; see Francis, Peter.
Smith, Barry C.; Johnson, Ellis L. *Robust Airline Fleet Assignment: Imposing Station Purity Using Station Decomposition.* 497.
Smith, Barry C.; see Johnson, Ellis L.
Song, Haiqing. *Dynamic Flow Management Problems in Logistics Networks (TSL Dissertation Abstract).* 256.
Sorkin, Gregory B.; see Günlük, Oktay.
Soumis, François; see Hamdouni, Mohamed.
Speranza, M. G.; see Archetti, C.
Speranza, M. Grazia; see Archetti, Claudia.
Staats, Raymond W.; see Sherali, Hanif D.
Tang, Jiafu; see Yung, Kai-Leung.
Thorson, Ellen. *The Integrative Freight Market Simulation: An Application of Experimental Economics and Algorithmic Solutions (TSL Dissertation Abstract).* 257.
Trani, Antonio A.; see Sherali, Hanif D..
Tzur, Michal; see Francis, Peter.
van den Broek, M. S.; van Leeuwaarden, J. S. H.; Adan, I. J. B. F.; Boxma, O. J. *Bounds and Approximations for the Fixed-Cycle Traffic-Light Queue.* 484.
van Leeuwaarden, J. S. H. *Delay Analysis for the Fixed-Cycle Traffic-Light Queue.* 189.
van Leeuwaarden, J. S. H.; see van den Broek, M. S.
van Putten, Marianne; see Hamdouni, Mohamed.
Vossen, Thomas W. M.; Ball, Michael O. *Slot Trading Opportunities in Collaborative Ground Delay Programs.* 29.
Wagner, Michael R.; see Jaillet, Patrick.
Wang, Dingwei; see Yung, Kai-Leung.
Wang, Fan; see Lim, Andrew.
Wang, Qian; see Berman, Oded.
Xu, Hang; see Chen, Zhi-Long.
Xu, Zhou; see Lim, Andrew.
Yang, Fan. *An Evolutionary Game Theory Approach to Day-to-Day Traffic Dynamics (TSL Dissertation Abstract).* 257.
Yen, Joyce W.; Birge, John R. *A Stochastic Programming Approach to the Airline Crew Scheduling Problem.* 3.
Yerra, Bhanu; see Levinson, David.
Yung, Kai-Leung; Tang, Jiafu; Ip, Andrew W. H.; Wang, Dingwei. *Heuristics for Joint Decisions in Production, Transportation, and Order Quantity.* 99.
Zhao, Jiamin; Dessouky, Maged; Bukkapatnam, Satish. *Optimal Slack Time for Schedule-Based Transit Operations.* 529.

Volume 40—2006
Subject Index

Acknowledgment to referees: 130
Advanced information: 200
Air traffic flow management: 29
Air traffic management: 147
Air transportation: 133
Aircraft conflict resolution: 147
Aircraft routing: 15
Airline crew scheduling: 300
Airline equity: 147
Airline fleet assignment: 497
Airline fleeting: 517
Airline operations: 3, 15
Approximations: 484
Benders decomposition: 517
Bounds: 484
Branch and cut: 117
Branch and price: 235
Bulk-service queue: 484
Bus parking and dispatching: 364
Circulation of rolling stock: 378
Collaborative decision making: 29, 133
Column generation: 74, 313
Competitive ratio: 200
Congested flow: 165
Congestion: 393
Consistent routes: 269
Container port terminal: 473
Continuous approximations: 351
Continuum approximation: 89
Crew scheduling: 3
D/G/c queue: 529
Decomposition: 99, 300
Discrete-time queue: 189
Distribution strategies: 287
Driver behavior and traffic stream properties: 165
Driver staffing: 313
Dynamic programming: 235
Dynamic vehicle routing: 74, 421
Entropy maximization: 269
Fixed-cycle traffic light: 189
Fixed-point problems: 44
Fixed-time control: 484
Flight scheduling: 15
Freight transportation: 473
Future events: 211
Ground delay programs: 29
Heuristics: 74, 117, 421
Home delivery services: 327
Information: 393
In memoriam: 1
Integer programming: 133, 313, 364, 497
Inventory: 287
Kinematic waves: 165
Lagrange relaxation: 99
Large neighborhood search: 455
Large-scale optimization: 300
Linear programming: 133
Logistics: 117, 439
Mean delay: 484
Metaheuristics: 64, 455
Minimum quantity commitment: 117
Mixed-integer programming: 147
Multicommodity flow model: 378
Multioutput cost functions: 259
National airspace: 147
Network evaluations: 179
Network growth: 179
Nonlinear equations: 44
OD matrix estimation: 44
Online routing problems: 200
Overflow: 484
Parallel tabu search: 211
Performance: 351
Pickup and delivery problems with time windows: 455
Probabilistic knowledge: 211
Production/distribution coordination: 99
Prospect theory: 409
Public transportation: 351
Queueing theory: 189
Railway transportation: 378
Real time: 211
Reference point: 409
Returns to scale: 259
Revenue: 517
Reverse logistics: 235
Robust operations: 15
Robust optimization: 300
Robust scheduling: 497
Robust solutions: 364
Route choice: 393, 409
Route guidance: 44
Sector workload measures: 147
Selection and assignment: 117
Self-organization: 179
Sensitivity: 540
Service choice: 439
Slack time: 529
Slot exchange: 29
Split deliveries: 226
Split delivery vehicle routing problem: 64
Stationary distribution: 189
Stochastic ground-holding problem: 133
Stochastic network equilibrium: 409
Stochastic programming: 3
Stochastic vehicle routing: 421
Strong regularity: 540
Supply chain management: 99, 287
Tabu search: 64, 342
Terminal design: 89
Terminal operations: 473
Three-dimensional packing: 342
Time windows: 74
Traffic assignment: 269

Traffic engineering: 189
Traffic equilibria: 540
Traffic flow theory: 165
Traffic light: 484
Traffic networks: 44
Transform solution: 189
Transit operation: 529
Transit service design: 351
Transport production: 259
Transportation economics: 259
Triangle inequality: 64
Two-regime models: 165
Unique route flows: 269
Urban transportation services: 313
Valid inequalities: 147
Vehicle dispatching: 211
Vehicle routing: 226, 235, 313, 327, 342, 439
Worst-case analysis: 226
